

ELEVATING WAREHOUSE SAFETY WITH REDPOINT'S SOLUTION

Managing a busy warehouse means building a culture of safety and optimizing processes and operations within that framework to maximize efficiency.

The stakes are high. In fact:

- OSHA estimates that forklift accidents account for **85 deaths** and almost **35,000 serious injuries** every year in the U.S.
- Other studies indicate that the average cost per incident is between **\$180,000** and **\$300,000**

YOU NEED TO REDUCE RISK, AND REDPOINT CAN HELP.

With our new warehouse safety solution, you can:

-  Leverage real-time location tracking
-  Integrate it with vehicle telematics
-  Reduce the frequency and severity of warehouse incidents
-  Get alerts and messages
-  Create keep-in and keep-out zones
-  Ensure qualified operators are the only ones using equipment
-  Monitor time in hazardous areas

Stay compliant with regulatory standards

- Standard and custom reporting
- Location details, heat maps, spaghetti diagrams and more
- Automatic compliance reports

Integrate the solution with existing warehouse management systems

-  Open API architecture
-  Existing data to craft key data elements for compliant operation

Reduce the risk of COVID-19 spread

- Real-time alerts for social distancing violations
- View proximity and time spent together for robust contact tracing

Respond to incidents in real time

- Dashboard to display real-time vehicle status
- Immediate notifications for supervisors and managers when violations occur
